**REPORT illegal
woodcutting or illegal
off-road travel!**

Call your local Ranger
District for details.

REPORT wildfire

Call 911 or Central Oregon
Interagency Dispatch Center
(COIDC) 541-416-6800
or 800-314-2560

REQUIREMENTS Checklist:

**READ the RULES and REGULATIONS on pages 3-5
AND on the map of your cutting area.***

*YOU are responsible for knowing these rules and regulations.

☐ **Permit*, Load Tags, Synopsis, Map of cutting area**

*Permittee MUST BE PRESENT when cutting, loading and transporting wood

☐ **Shovel, Fire Extinguisher and Spark Arresters**

☐ **Know the fire precaution level: Call 1-800-523-4737**

☐ **Cut or remove legal trees in designated area only**

☐ **No more than 8 cords per household annually**

☐ **Complete a one-hour fire watch**

☐ **Tag load properly BEFORE moving vehicle**

☐ **Fill out product quantity removal record on permit**

8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
Completely remove the day and month on each load tag as required by your permit or contract																0000001

USDA Forest Service
USDI Bureau of Land Management

Always properly validate your load tag(s) AND fill out removal record

See page 5 for
instructions on
how to properly
validate your
load tags.

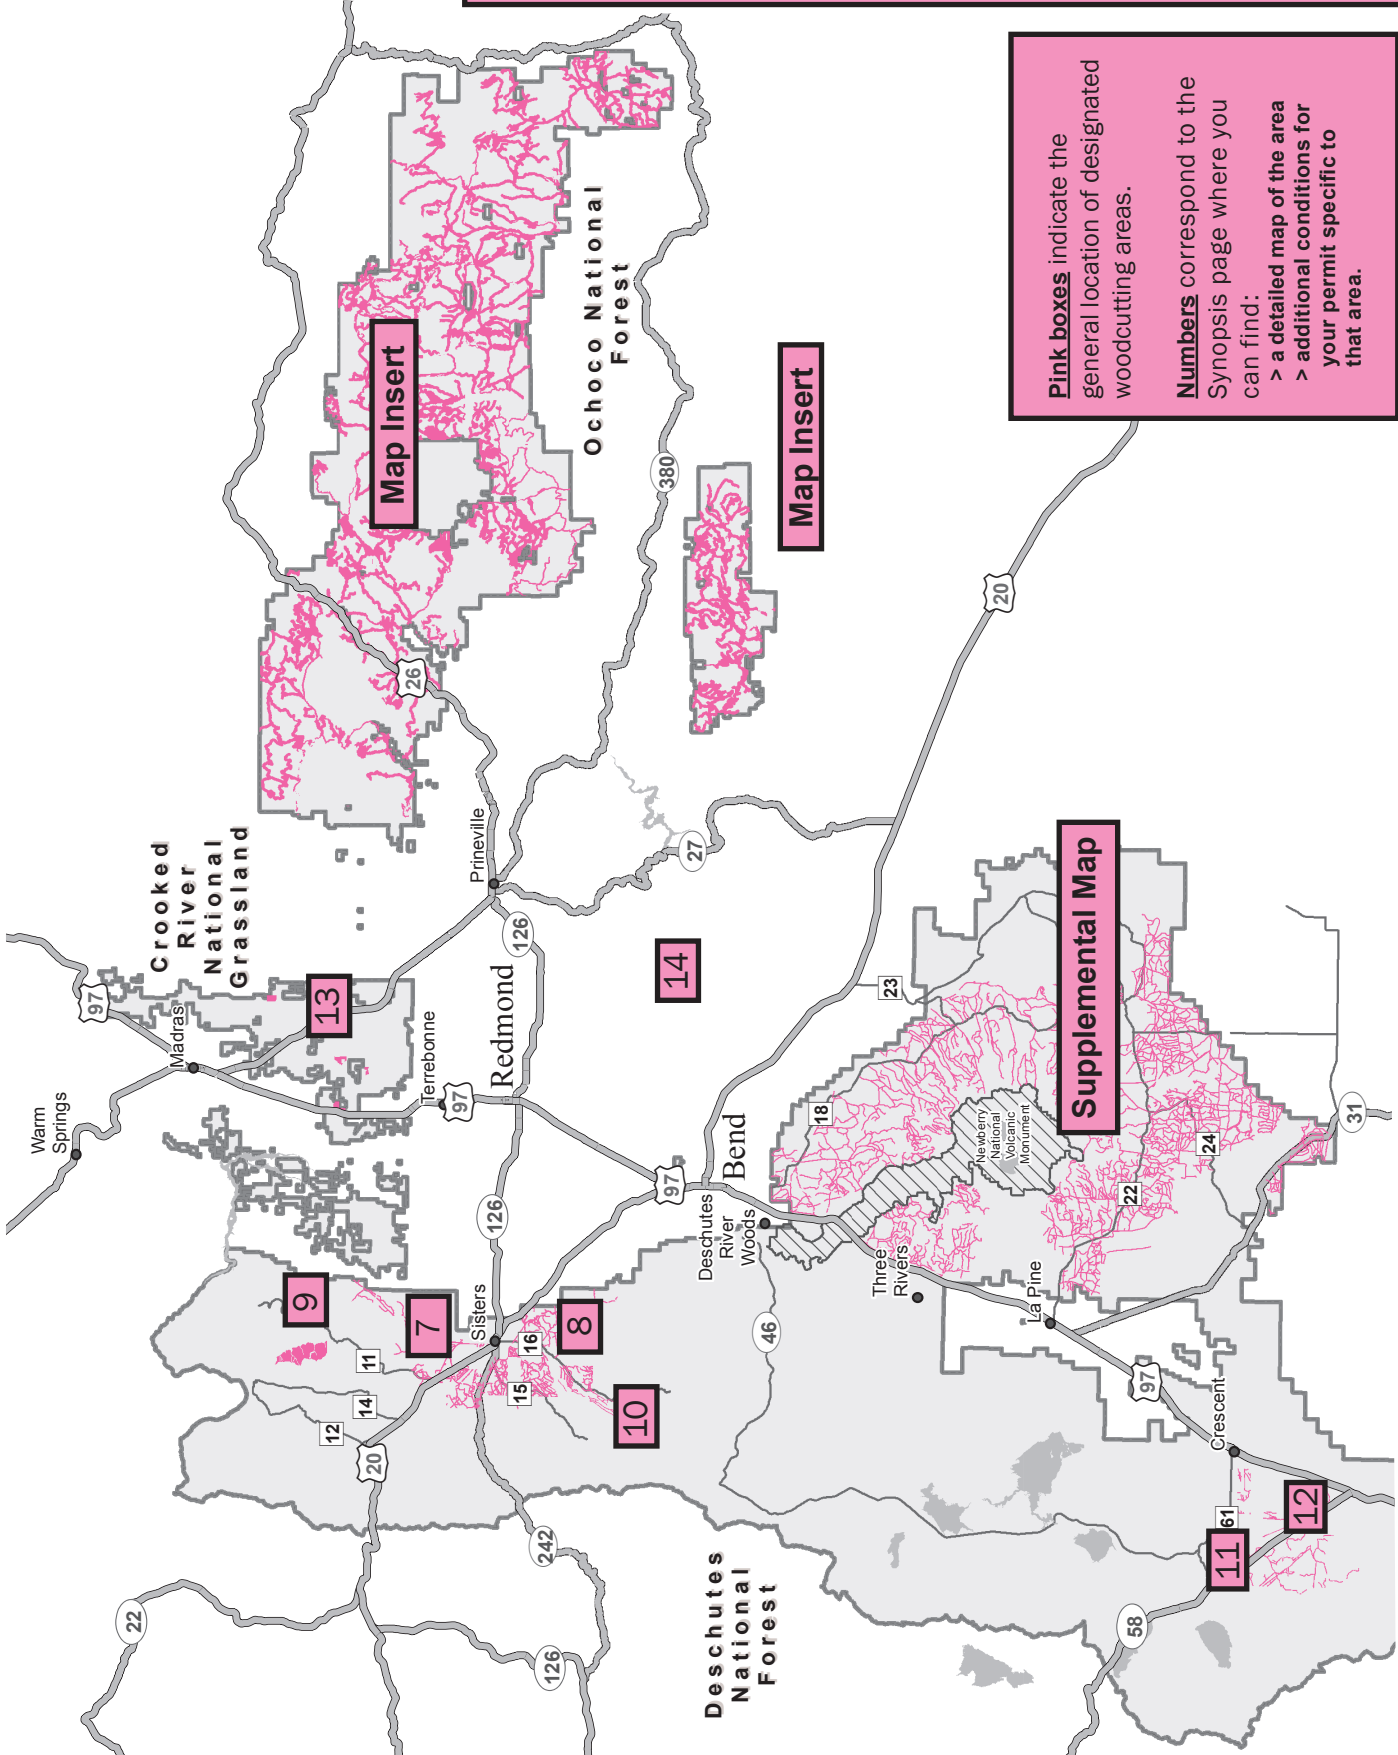

The **Bureau of Land Management - Prineville District** public use firewood area for western juniper is available to Central Oregon Personal Use Firewood Permit holders. The current woodcutting area map is located on page 14 of this synopsis.

Specific firewood cutting areas are subject to change. Call the BLM Prineville District at 541-416-6700 for woodcutting area updates.

ADDITIONAL FIREWOOD CUTTING AREAS may open after publication of the 2015 Synopsis. Contact a Ranger District office regarding the availability of additional areas and to obtain a map of those areas. **The specific USDA Forest Service map noting the location of additional areas is required to be in your possession when cutting or removing wood.**

2015 Central Oregon Firewood Area Vicinity Map

ADDITIONAL FIREWOOD CUTTING AREAS may open after publication of the 2015 Synopsis. Contact a Ranger District office regarding the availability of new areas and to obtain a map of the new area. **The specific USDA Forest Service map noting the location of new areas is required to be in your possession when cutting or removing wood.**

Rules and Regulations

In addition to *General and Other Conditions* listed on your permit, violation of the following rules can result in fines and/or suspension of firewood cutting privileges.

1) Woodcutter must have in their possession:

- ☐ Permit. Permittee must be present.
- ☐ Synopsis with map of the area where you are cutting.
- ☐ Load tags.
- ☐ Fire equipment (*all 3 required*):
 - Spark arrester 0.023" or less on chain saw.
 - Shovel - long handled, round point, 8" blade (size 0).
 - Fire extinguisher with a pressurized chemical of no less than 8 ounce capacity by weight.

2) A current year's load tag must be validated by completely removing the month and day that you are removing the firewood. The validated tag must be highly visible at the back of the load, and displayed prior to moving the vehicle.

Previous year's tags are not valid. One tag is required for every 1/2 cord of firewood, or any portion thereof. See calendar and illustrations on page 5.

3) Fill out Product Removal Record on your signed permit.

4) Woodcutting activity is permitted only within designated firewood area boundaries as specified on woodcutting map.

5) **WOODCUTTING IS PROHIBITED** in all posted timber sales, contract areas, developed campgrounds, old growth areas, research natural areas, riparian areas, wilderness areas and all other areas posted closed to woodcutting. (Riparian areas are defined as land within 300 feet of water such as springs, streams, wet meadows, floodplains and overflow channels; or within 150 ft. of these features on the Ochoco National Forest)

6) Do not cut trees (standing and/or down) marked with paint, signs, wildlife tags, blazes or with any evidence of wildlife habitation such as nests or cavities.

7) Open and close dates, species authorized for removal and other restrictions vary depending on the specific

See specific cutting area maps for opening dates.

All areas CLOSE by November 30, 2015.

designated firewood area. These restrictions are listed in the box above the individual area maps.

8) **Woodcutting is authorized for dead trees only, or as specified on woodcutting maps.** Some areas do not allow the cutting of standing dead trees.

9) **Where cutting of standing trees is allowed, stump heights can't exceed 12 inches. Maximum length** of wood allowed to be transported is **6 feet**. Remove all wood down to 3 inches in diameter for less waste.

10) **Protect all green trees and other vegetation** during falling and removal activities. Live trees and other vegetation may not be cut to create access to firewood.

11) **The only power equipment authorized for use are:** chainsaws, winches and hydraulic splitters, unless otherwise prohibited in specific cutting areas.

12) Each household may purchase **up to 8 cords of personal-use firewood annually**. Cost is \$10.00 per cord; minimum purchase of two cords per permit.

13) **Woodcutters must comply with all road closures, seasonal road closures, and transport firewood in vehicles less than 26,000 lbs GVW.**

14) Off road travel restrictions are noted on each specific cutting area map.

15) Cut and scatter limbs and tops so they lie no more than 12" from the ground. This reduces potential for wildfire. Remove all slash from roads and ditches.

16) Fire restrictions are listed on page 4 and must be followed.

Woodcutter FIRE Requirements

You must **KNOW** and **COMPLY WITH** the current Industrial Fire Precaution Level (IFPL).

Call the toll-free **24-hour recorded message line** at: **1-800-523-4737**

or Visit the Central Oregon Fire website at: www.fs.fed.us/r6/centraloregon/fire/ifpl

Scan this QR code with your smartphone to be directed to the Central Oregon Fire information website.

INDUSTRIAL FIRE PRECAUTION LEVELS

Level I:

Stay in the area for one hour after power equipment has been shut off to watch for fire starts AND carry equipment listed below.

Level II:

SHUT DOWN ALL POWER EQUIPMENT AT 1:00 PM, AND STAY IN THE AREA FOR ONE HOUR after power equipment has been shut off to watch for fire starts AND carry equipment listed below.

Level III and IV: All woodcutting activity is **PROHIBITED**.

All Precaution Levels Require:

ALL power equipment be in good repair with a screen type spark-arrester of 0.023" or less and qualified under USDA/USDI Federal standards.

AND ALWAYS keep **BOTH** of the following tools with you:

- ☐ **Shovel:** Long-handled round point with an 8" blade (Size 0) in possession of operator.
- ☐ **Fire Extinguisher:** Pressurized chemical of not less than 8 ounce capacity by weight.

Remember

Faulty spark arresters cause wildfires! *Maintain your saw screen and keep your saw in good working order.*

Parking on vegetation causes wildfires! *Park in cleared areas away from brush and grass.*

Careless smoking causes wildfires! *Use your ashtray.*

Wildfires are expensive! *Don't be the cause of one.*

To report a wildfire call 911 or

Central Oregon Interagency Dispatch Center 541-416-6800 or 800-314-2560

**All Woodcutting
Closes By
November 30, 2015**

1. Measure your load of wood to determine how many tags are necessary

ONE CORD = (4 feet) x (4 feet) x (8 feet) = 128 cubic feet
height x width x length

Shortbed pickup truck

1/2 cord or less = 1 tag

Full size pickup truck

1/2 cord or less = 1 tag

Full-size pickup with rails

1 cord = 2 tags

2. Properly validate your load tags

This permit requires you to COMPLETELY REMOVE the current day and month tabs from each load tag needed ON THE DAY YOU ARE REMOVING FIREWOOD.

SECURELY ATTACH all required load tags to the back of your load in a highly visible location.

ATTACH ONE CURRENT YEAR'S LOAD TAG FOR EACH 1/2 cord or portion thereof (see #2 on page 3).

FILL OUT PRODUCT REMOVAL RECORD on permit.

Central Oregon Tree Descriptions

Lodgepole pine bark is thin, flaky and gray with no crevices, except near the base of the tree. Prickly, egg-shaped cones, seldom longer than 2 inches, may remain closed on the tree for years.

Ponderosa pine egg-shaped cones are 3-6 inches long and each scale is tipped with a short, straight prickle, hence the nickname "prickly ponderosa." The bark is much thicker than lodgepole pine bark and sheds jigsaw puzzle flakes. The bark on young trees is nearly black, while mature trees are yellow or orange in color. Bark crevices of older trees and cut branches have a pitchy smell similar to turpentine.

Lodgepole pine-two needle bundles 1-3" long, thin gray bark with no crevices.

Ponderosa pine-three needle bundles 5-10" long. Bark is much thicker than lodgepole and has crevices.

juniper

Juniper needles are tiny, scalelike and scratchy to the touch. Juniper trees have bluish-white coated berries instead of cones. The bark is thin, reddish-brown and fibrous.

White fir horizontal branches form a pointed, narrow crown. Flat, flexible needles extend in rows perpendicular to the stem. Needles are light bluish green with white lines above and are 1 to 2.5 inches long. Light gray bark is much thicker than lodgepole pine bark. Cones are greenish-yellow or purplish, 3-5 inches long, and cylindrical, growing upright from the topmost twigs. Cone scales have fine hairs and short concealed bracts. White fir produces a fragrant resin which rises in small blisters on the trunk.

white fir

Douglas-fir

Douglas-fir needles are 1 inch long with a blunt tip. They surround the twig like the bristles of a bottle brush and are soft to touch. Cones are 3-4 inches long. Pitchfork shaped bracts are longer than the scales and hang down. The bark has resin blisters when young and is reddish-brown with deep furrows when mature.

Western larch also called Tamarack is Oregon's only native conifer that sheds its needles after they turn yellow in the late fall or winter. Spring needles are very light green and darken over the summer. Needles cluster on stout woody pegs. Whiskery cones are small and woody, 1-2 inches long with papery bracts that are longer than the scales. Bark is reddish-orange, furrowed and flakes off in irregular shaped pieces.

fall-winter

Want to learn more about trees? Contact your local Ranger District.

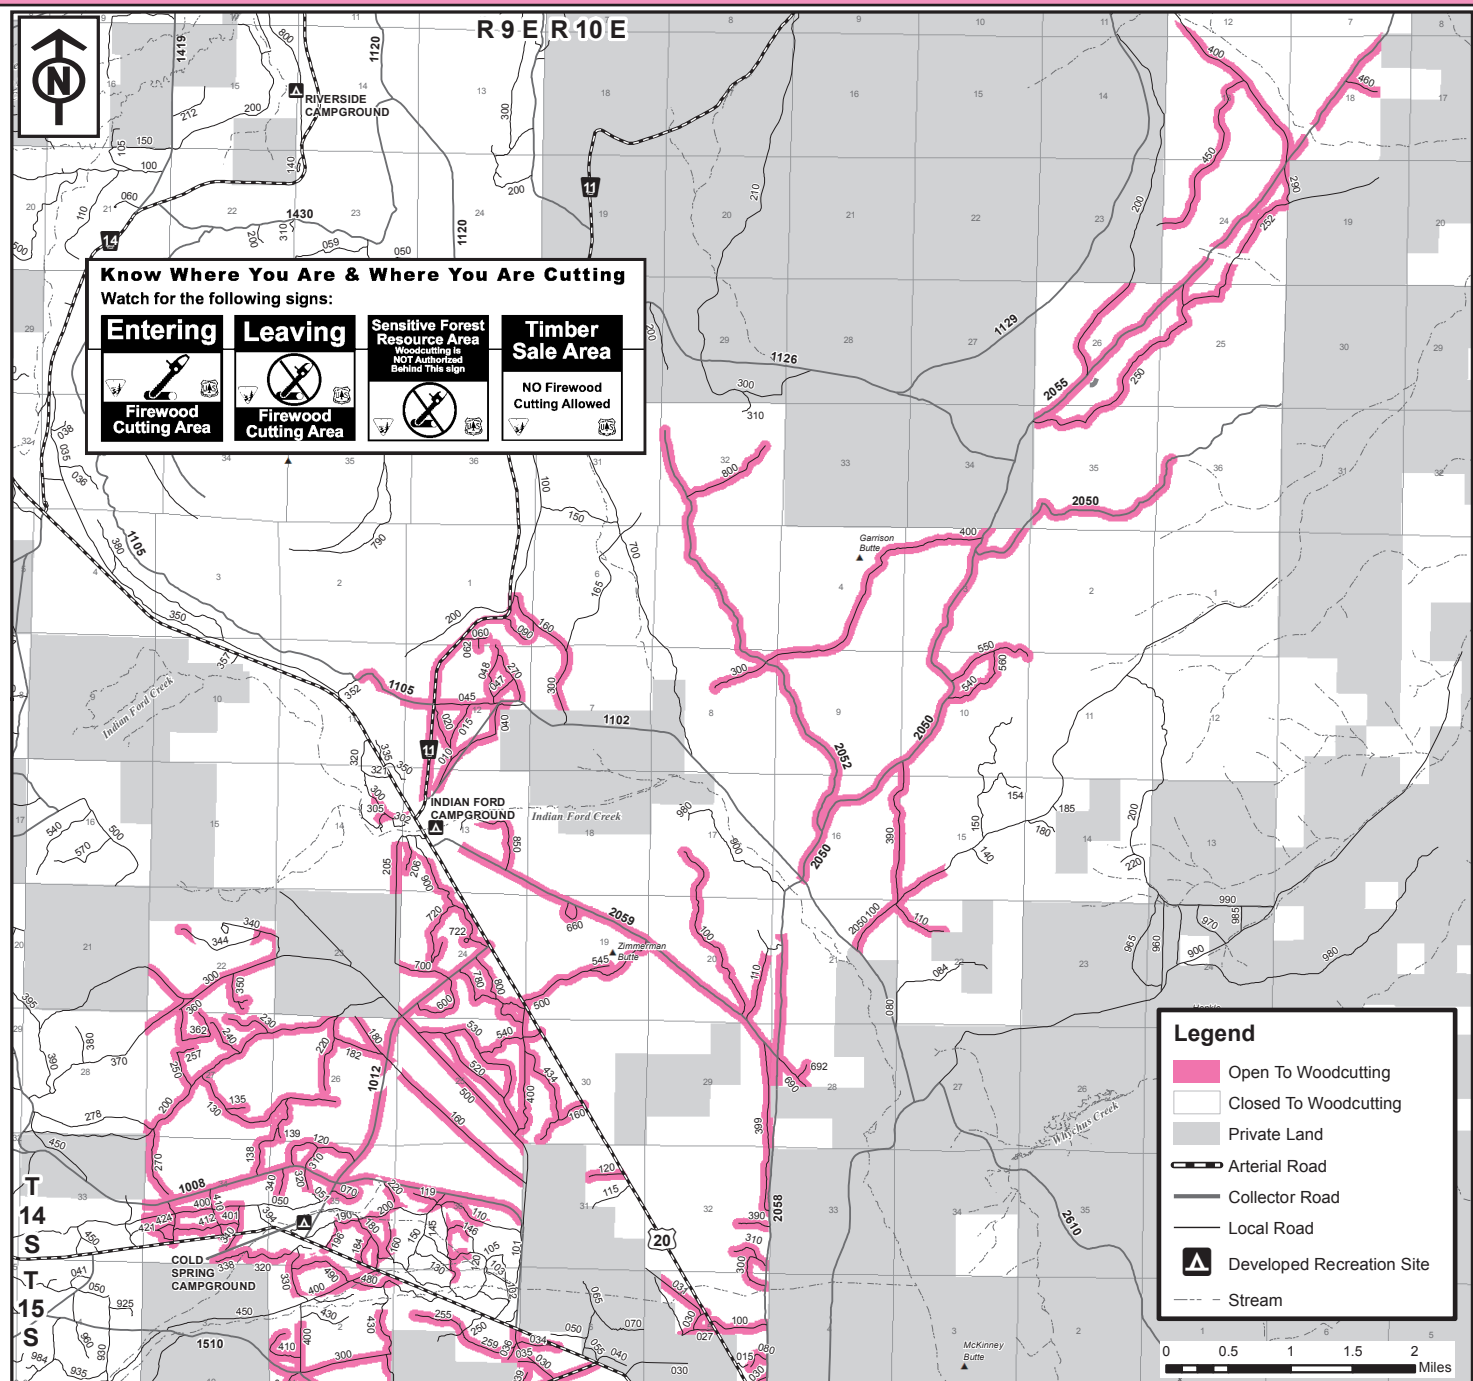

YOU CAN CUT AND REMOVE: Down trees of any species within 150 feet of the road edge on roads open to woodcutting. Roads open to woodcutting are highlighted in pink on the map below.

Woodcutting is prohibited in the following areas:

- Roads not highlighted in pink
- All posted timber sales
- Within 200' of any cave
- Within 300' of any riparian area (defined as springs, streams, wet meadows, floodplains or overflow channels)
- All other areas posted closed to woodcutting

Special Regulations: Vehicles must stay on roads or road shoulders. (Road shoulder defined as within 20' of the road edge). Off road travel is not allowed. Motorized travel for the purpose of firewood harvest must comply with restrictions found on Forest Service Motor Vehicle Use Maps. No winching of material is allowed. Do not cut, remove, or disturb material that has been piled for burning. Slash must be lopped and scattered so that it lies no more than 12 inches from the ground. All slash must be kept clear of roads and ditches. Leave gates as found to facilitate cattle grazing. Under the Archaeological Resource Protection Act it is illegal to damage, deface, excavate, or remove objects at archaeological sites, punishable by prison time and a substantial fine.

Directions: From Sisters, drive Northwest on Hwy 20 to access the general vicinity of this unit.

YOU CAN CUT AND REMOVE: Down trees of any species within 150 feet of the road edge on roads open to woodcutting. Roads open to woodcutting are highlighted in pink on the map below.

Woodcutting is prohibited in the following areas:

- Roads not highlighted in pink
- All posted timber sales
- Within 200' of any cave
- Within 300' of any riparian area (defined as springs, streams, wet meadows, floodplains or overflow channels)
- All other areas posted closed to woodcutting

Special Regulations: Vehicles must stay on roads or road shoulders. (Road shoulder defined as within 20' of the road edge). Off road travel is not allowed. Motorized travel for the purpose of firewood harvest must comply with restrictions found on Forest Service Motor Vehicle Use Maps. No winching of material is allowed. Do not cut, remove, or disturb material that has been piled for burning. Slash must be lopped and scattered so that it lies no more than 12 inches from the ground. All slash must be kept clear of roads and ditches. Leave gates as found to facilitate cattle grazing. Under the Archaeological Resource Protection Act it is illegal to damage, deface, excavate, or remove objects at archaeological sites, punishable by prison time and a substantial fine.

Directions: From Sisters, drive South on Elm Street approximately 0.5 miles until it becomes Three Creek Road (FS Road 16). Continue South approximately 1.5 miles to access the general vicinity of area. **OR** From Sisters, drive West on Hwy 242 1.5 miles to the junction of FS Road 15 to access the general vicinity of the area.

Green Ridge South

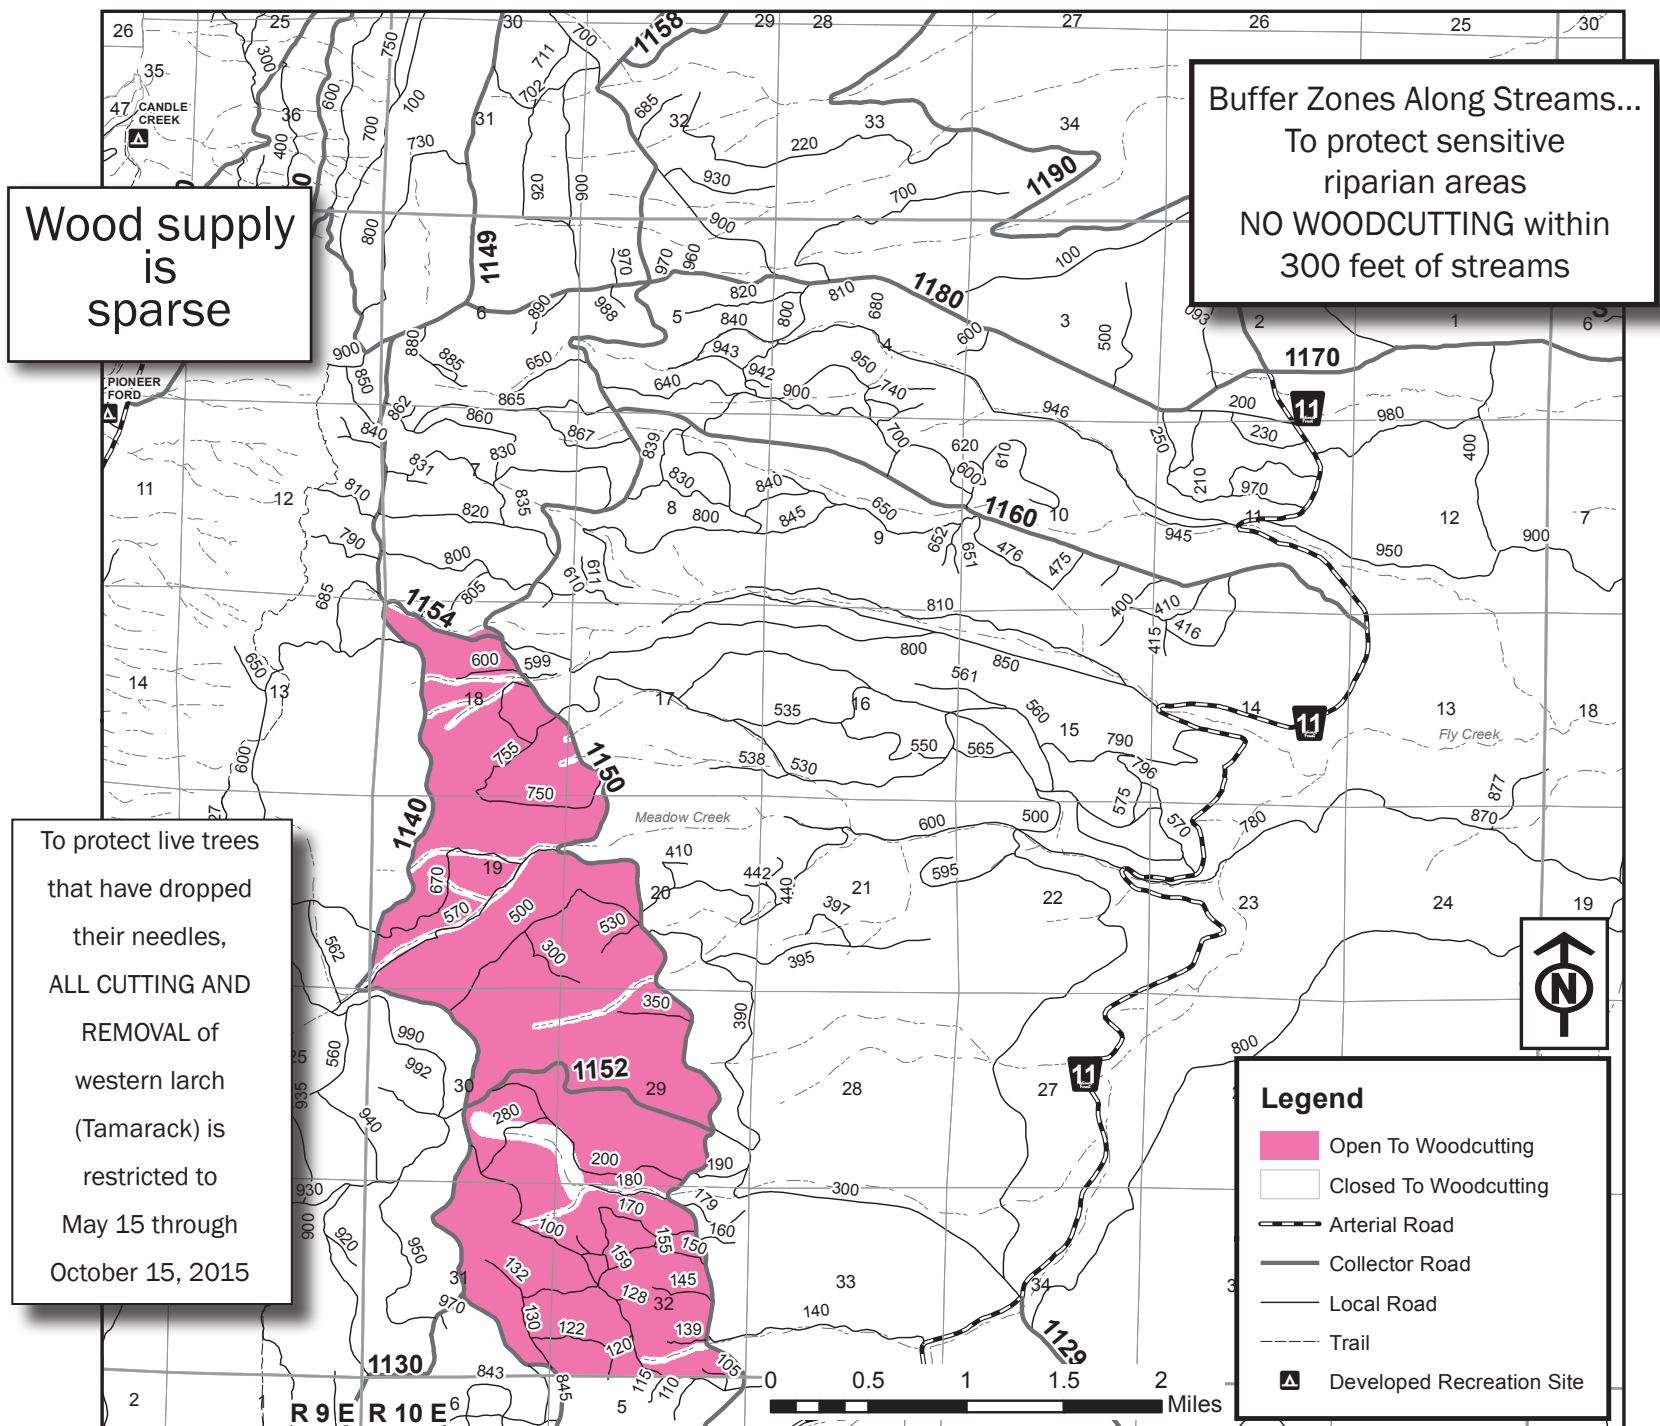

OPENS: April 27
CLOSES: November 30

YOU CAN CUT AND REMOVE: All species of standing dead or down dead EXCEPT Ponderosa pine.

CUTTING and REMOVAL of dead DOUGLAS-FIR is allowed only for: Standing or down trees less than 22 inches diameter, measured 12 inches above the root collar; OR the down portions only of trees greater than 22 inches diameter that are down as a result of NATURAL CAUSES (windthrown with root masses, parts broken out of standing trees), NOT FELLED BY CHAIN SAW.

Off road access is allowed. Live trees and other vegetation may not be cut to create access to firewood.

Directions: Located 16 miles north of Sisters. From Sisters, go NW on Hwy 20 approx. 5 miles to Road 11 at Indian Ford, then north on Road 11 approx. 10 miles to Road 1150, then 1150 north approx. 1 mile to Deschutes NF boundary and cutting area.

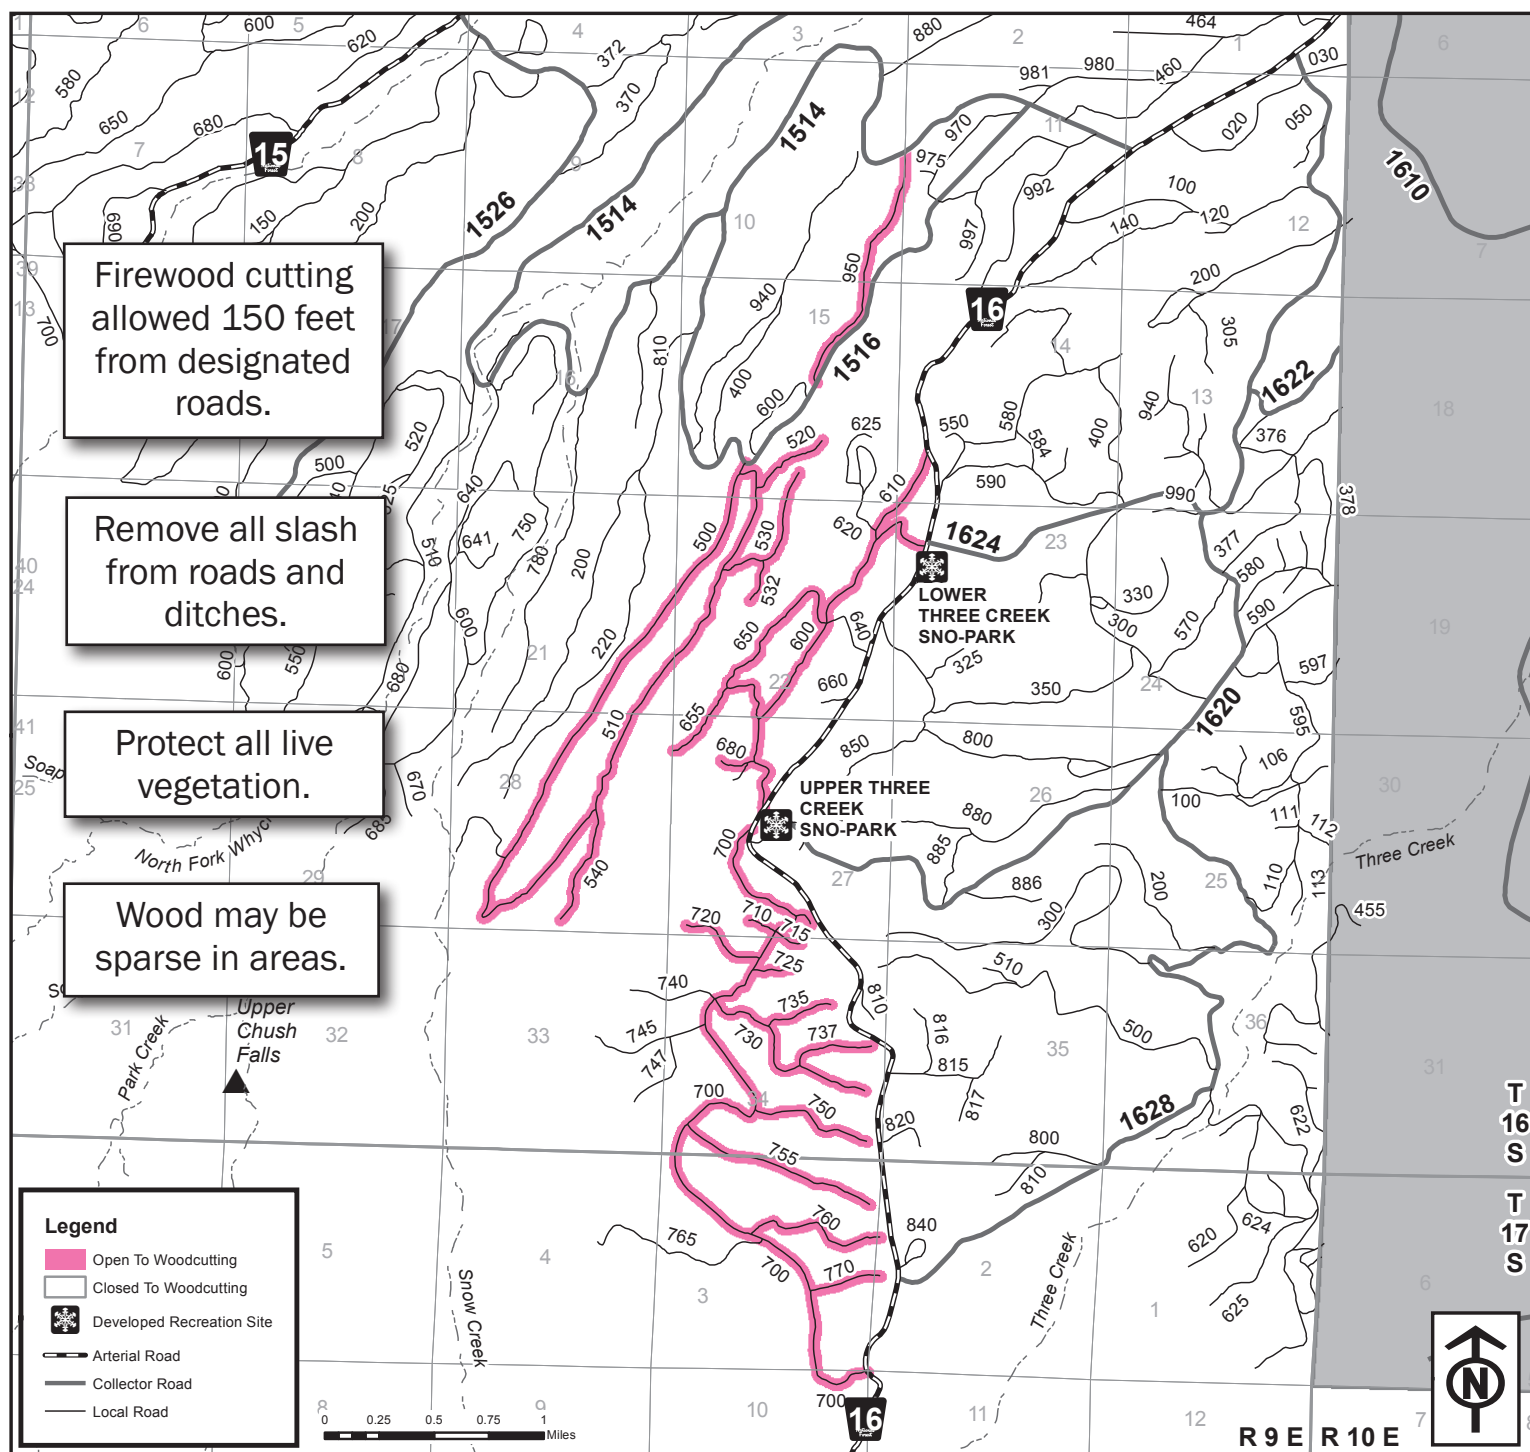

YOU CAN CUT AND REMOVE: All species of standing dead or down dead within 150 feet of designated roads. A standing dead tree will have no visible green needles. Trees may have been killed from fire, beetle attack, disease, mechanical or other. No firewood cutting shall occur outside of designated areas.

Restrictions: Off road access is **NOT** allowed. **No** cutting of live trees and/or vegetation shall occur in gaining access to firewood. Clear all created slash from roads.

All trees identified with “orange paint” (horizontal band) shall not be cut for firewood.

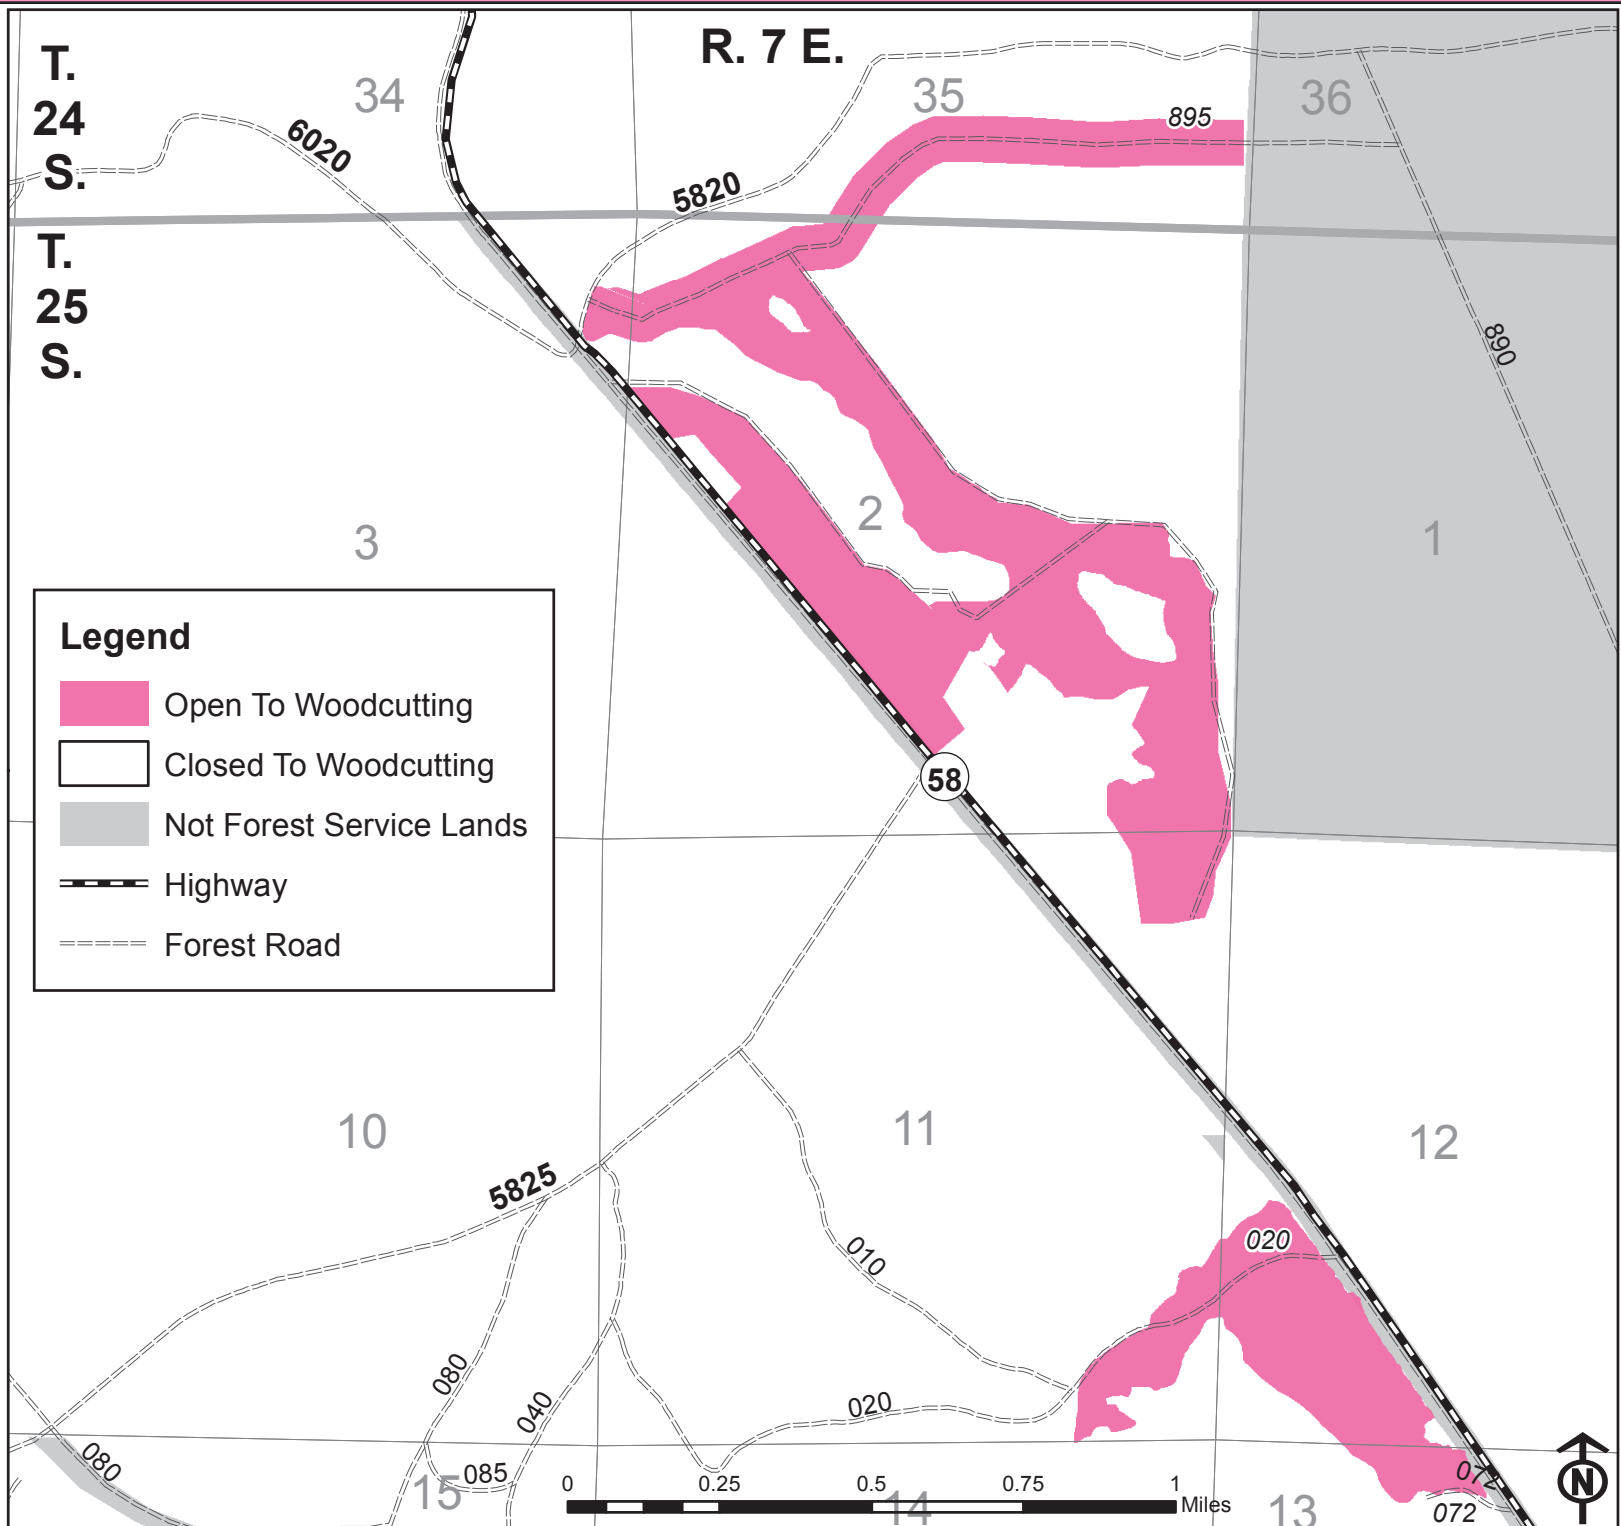

Note: Access on the 16 Road and the 1600-700 Road, above the Upper Three Creek Sno-Park, could be restricted early and late during the firewood cutting season due to weather and a seasonal gate closure on the 16 Road and the 1600-700 road.

Directions: Located approximately 10 miles south of Sisters on Road 16 (Elm Street). Area is west of Forest Service Road 16.

YOU CAN CUT AND REMOVE: Down and dead trees of all sizes and species, within the boundary of the tagged units, and within 200 feet of Road 6125895. Felling of standing dead and green trees is prohibited.

Directions: From Crescent Ranger District, travel South on Hwy. 97 approximately 10 miles. Go North on Hwy. 58 approximately 7 miles to Roads 072 or 020, and then approximately 2.5 miles to Road 5820.

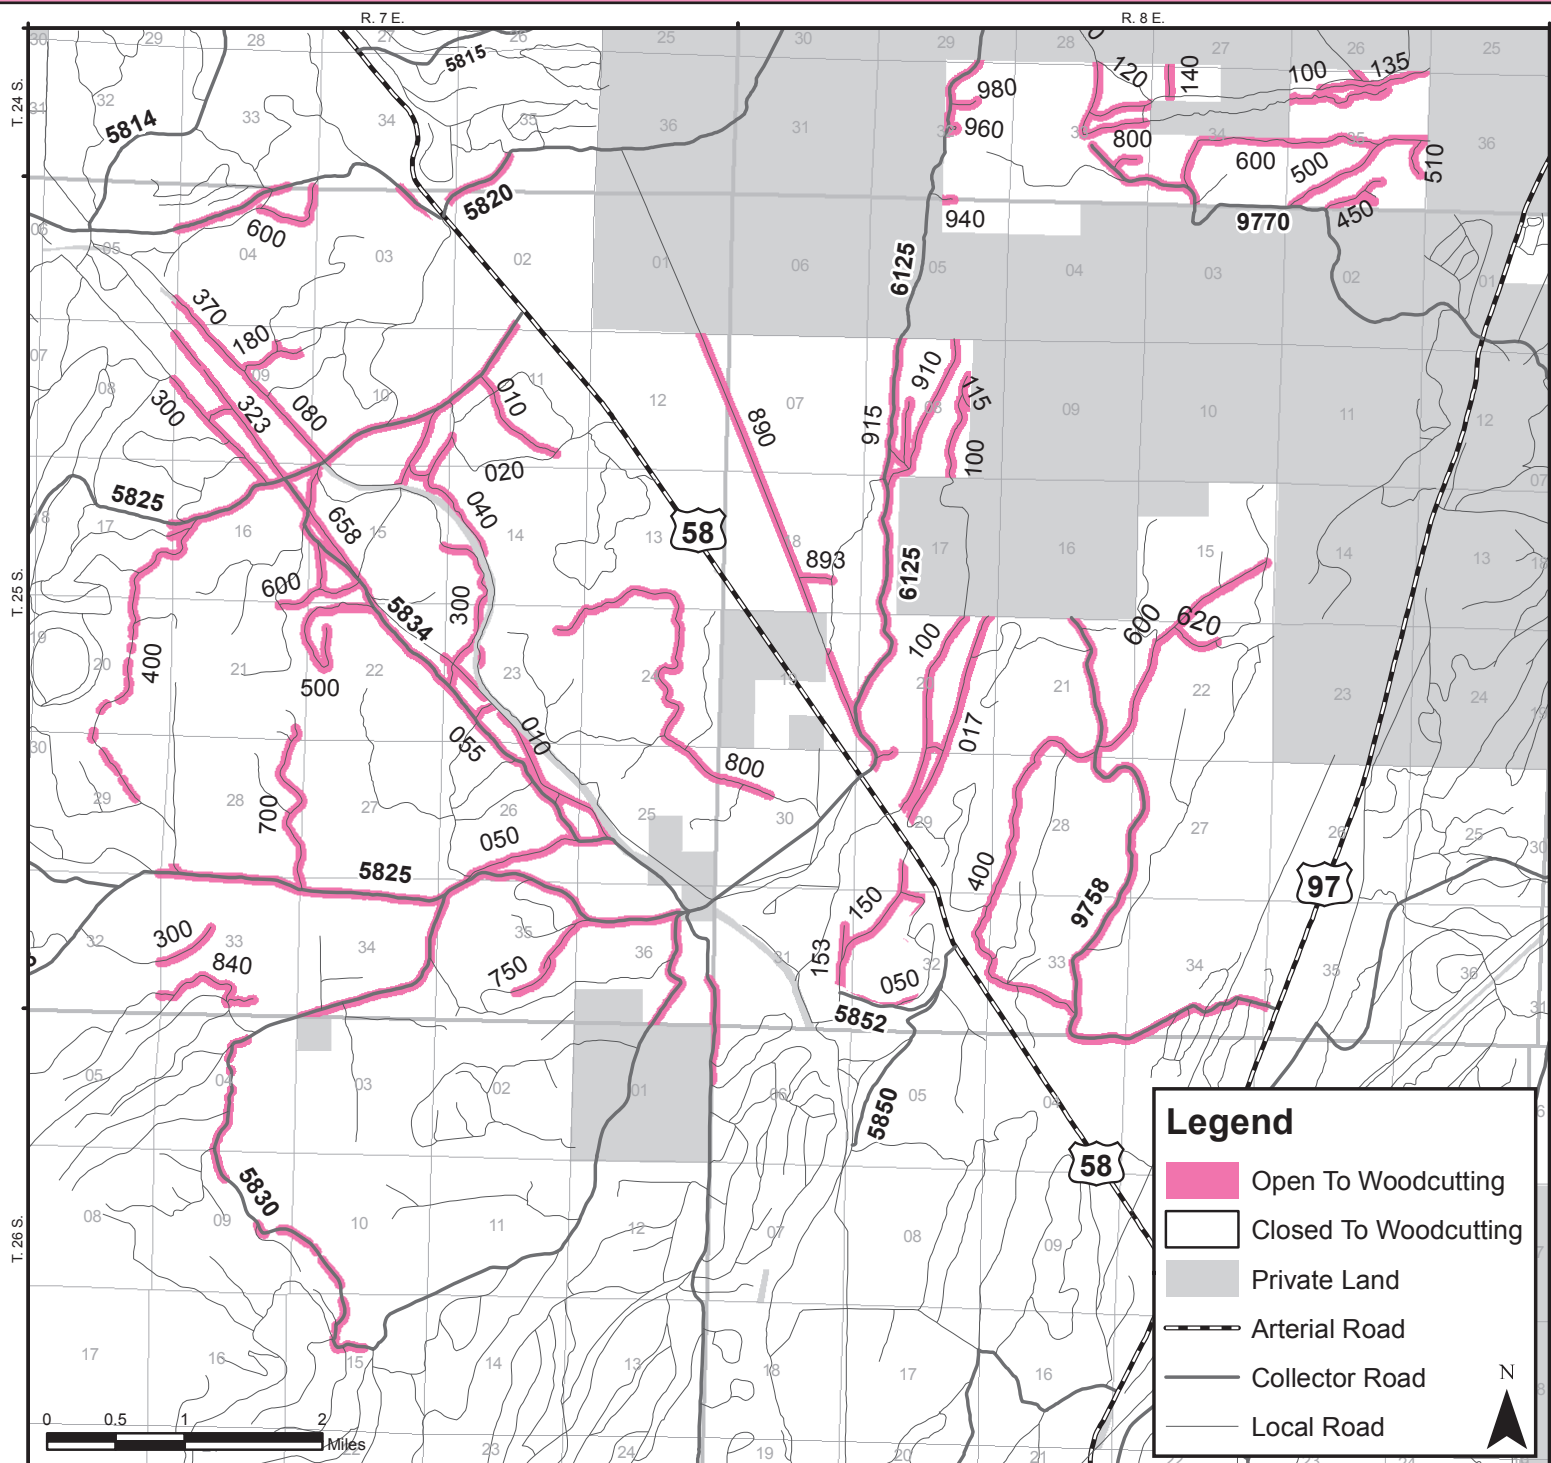

Roadside 4

OPENS: April 27
CLOSES: November 30

YOU CAN CUT AND REMOVE: Down wood only. Felling of dead and green trees is prohibited in this unit. Roads available for firewood removal are signed as entering or leaving the firewood cutting area. Firewood removal is restricted to a maximum of 200 feet from designated road.

Directions: From the Crescent Ranger District Office, go south on Hwy. 97 approximately 2.3 miles to Road 9770, then go west approx. 2 miles; or, go south on Hwy. 97 approximately 7.5 miles to road 9758; or, go south on Hwy. 97 approximately 9.5 miles to Hwy. 58 (Willamette Pass Hwy.) and then west 3 to 10 miles on Hwy. 58.

Grassland 1 - 4

OPENS: May 1
CLOSES: November 30

YOU CAN CUT AND REMOVE: Any JUNIPER tree, live or dead, less than 22" diameter outside bark, measured 12" above the ground.

Instructions for all firewood units: If cutting near a fence, leave no slash within 10 feet of the fence. If cutting near a road, remove all slash from the road and road ditch.

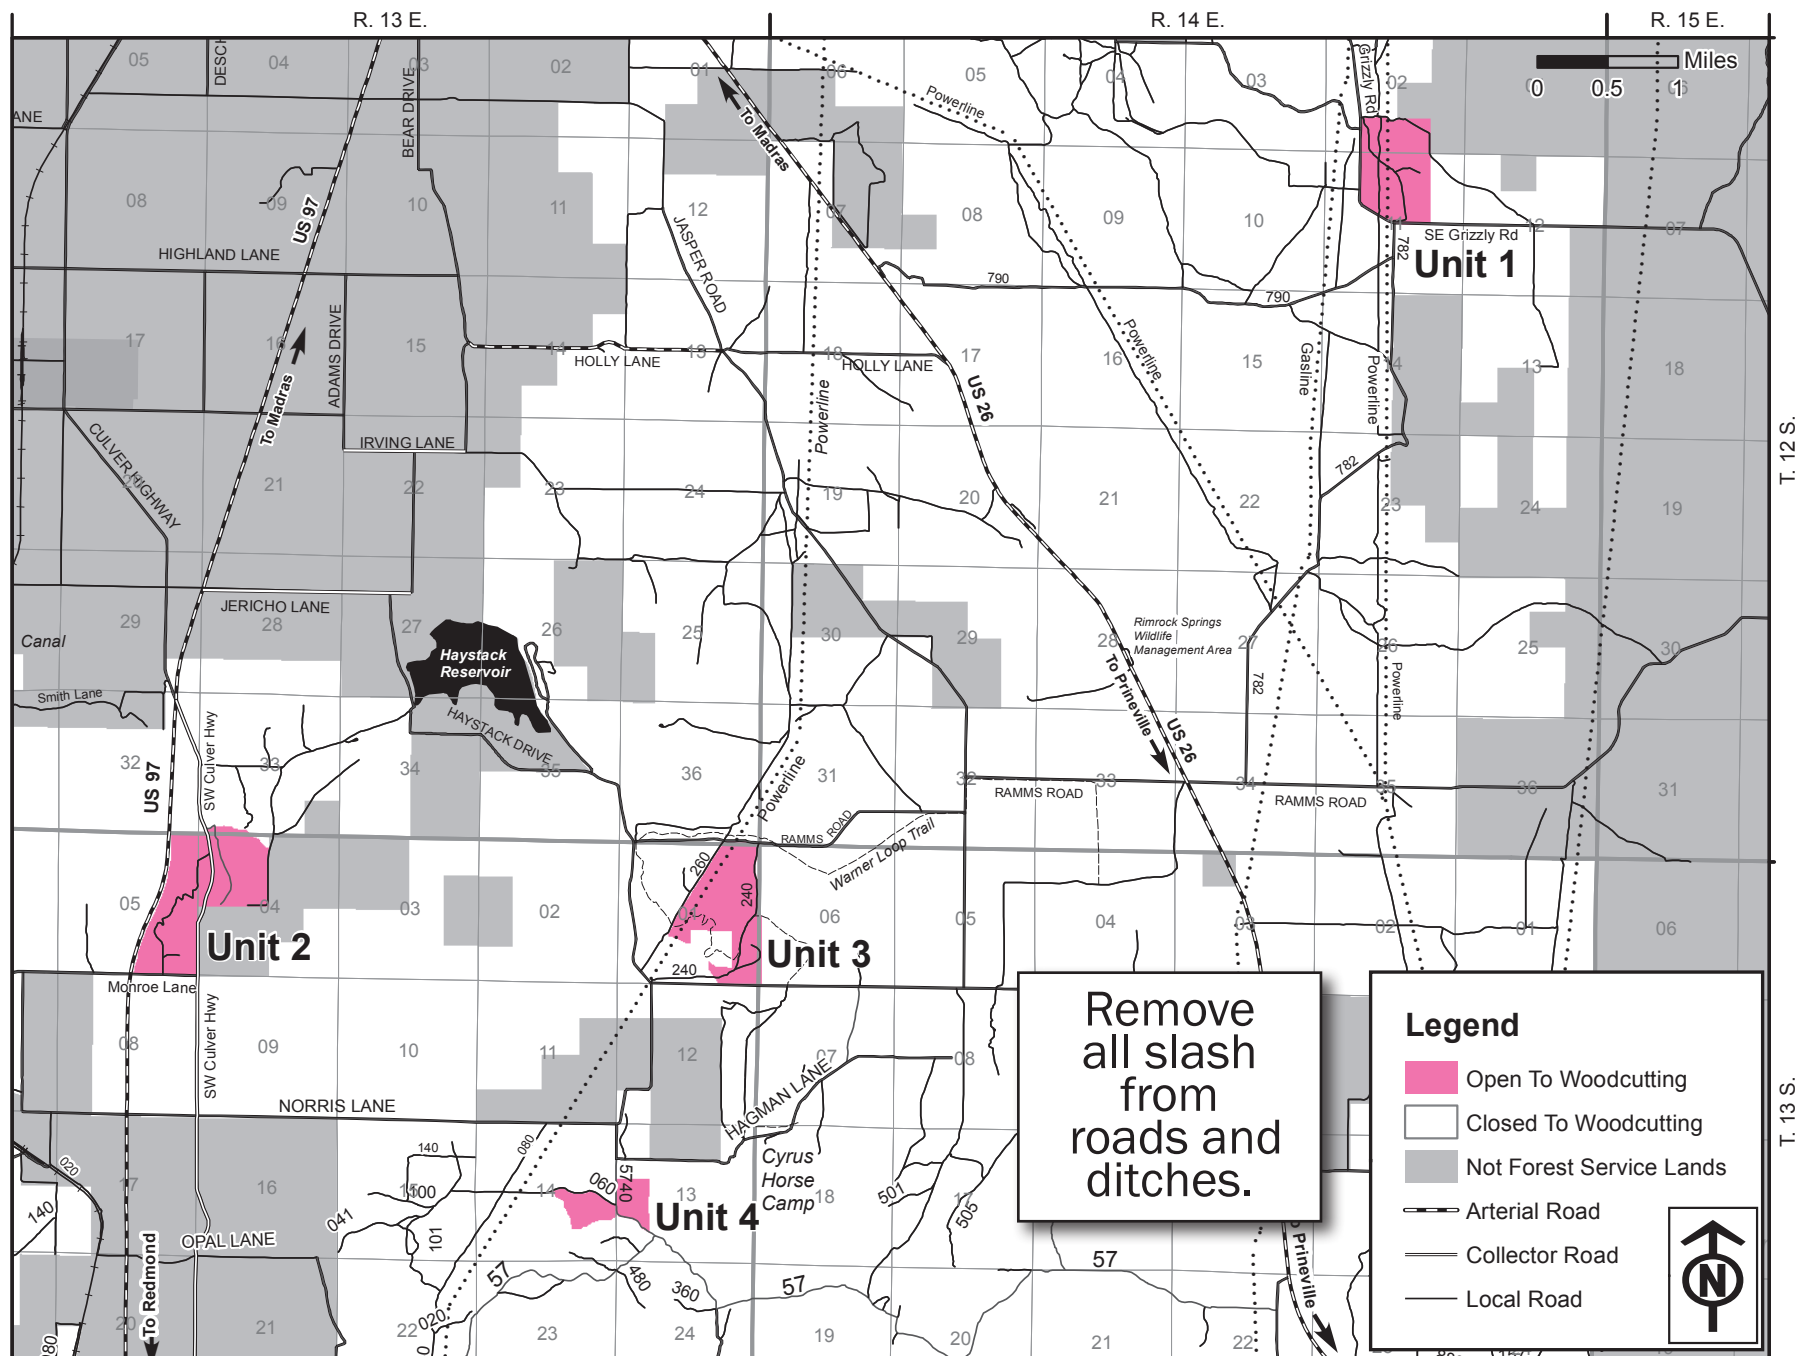

Off road access is NOT allowed.

Directions to Unit 1: Located 22 miles NW of Prineville. From Prineville, go NW on Hwy 26/Madras Hwy approximately 17 miles. Turn right (east) on Ramms Road for 1/3 mile, turn left (north) on County Road 782. Travel approximately 5 miles to SE Grizzly Road. Unit 1 is north of the County Road 782 and SE Grizzly Road intersection.

Directions to Unit 2: Located 10 miles South of Madras. From Madras, go South on Hwy 97 approximately 10 miles, turn left (east) on Monroe Lane. Unit 2 is north of Monroe Lane and east of Hwy 97.

Directions to Unit 3: From Madras, travel SE on Hwy 26 approximately 10 miles to Ramms Road and from Prineville, travel NW on Hwy 26/Madras Hwy approximately 17 miles. Turn west on Ramms Road and go approximately 3 miles to the 240 road and 260 roads (powerline). Do not cut juniper 25 feet from the edges of the Warner Loop Trail. In May, there are horse and foot races on the Warner Loop Trail, generally on the weekend. This trail is flagged with fluorescent lime-glow flagging.

Directions to Unit 4: From Madras, travel south on Hwy 97 approximately 11 miles to Norris Lane. Turn east on Norris Lane and go 3.5 miles to road 5740 and turn south. Travel approximately 1/2 mile south to access the unit.

Millican Road

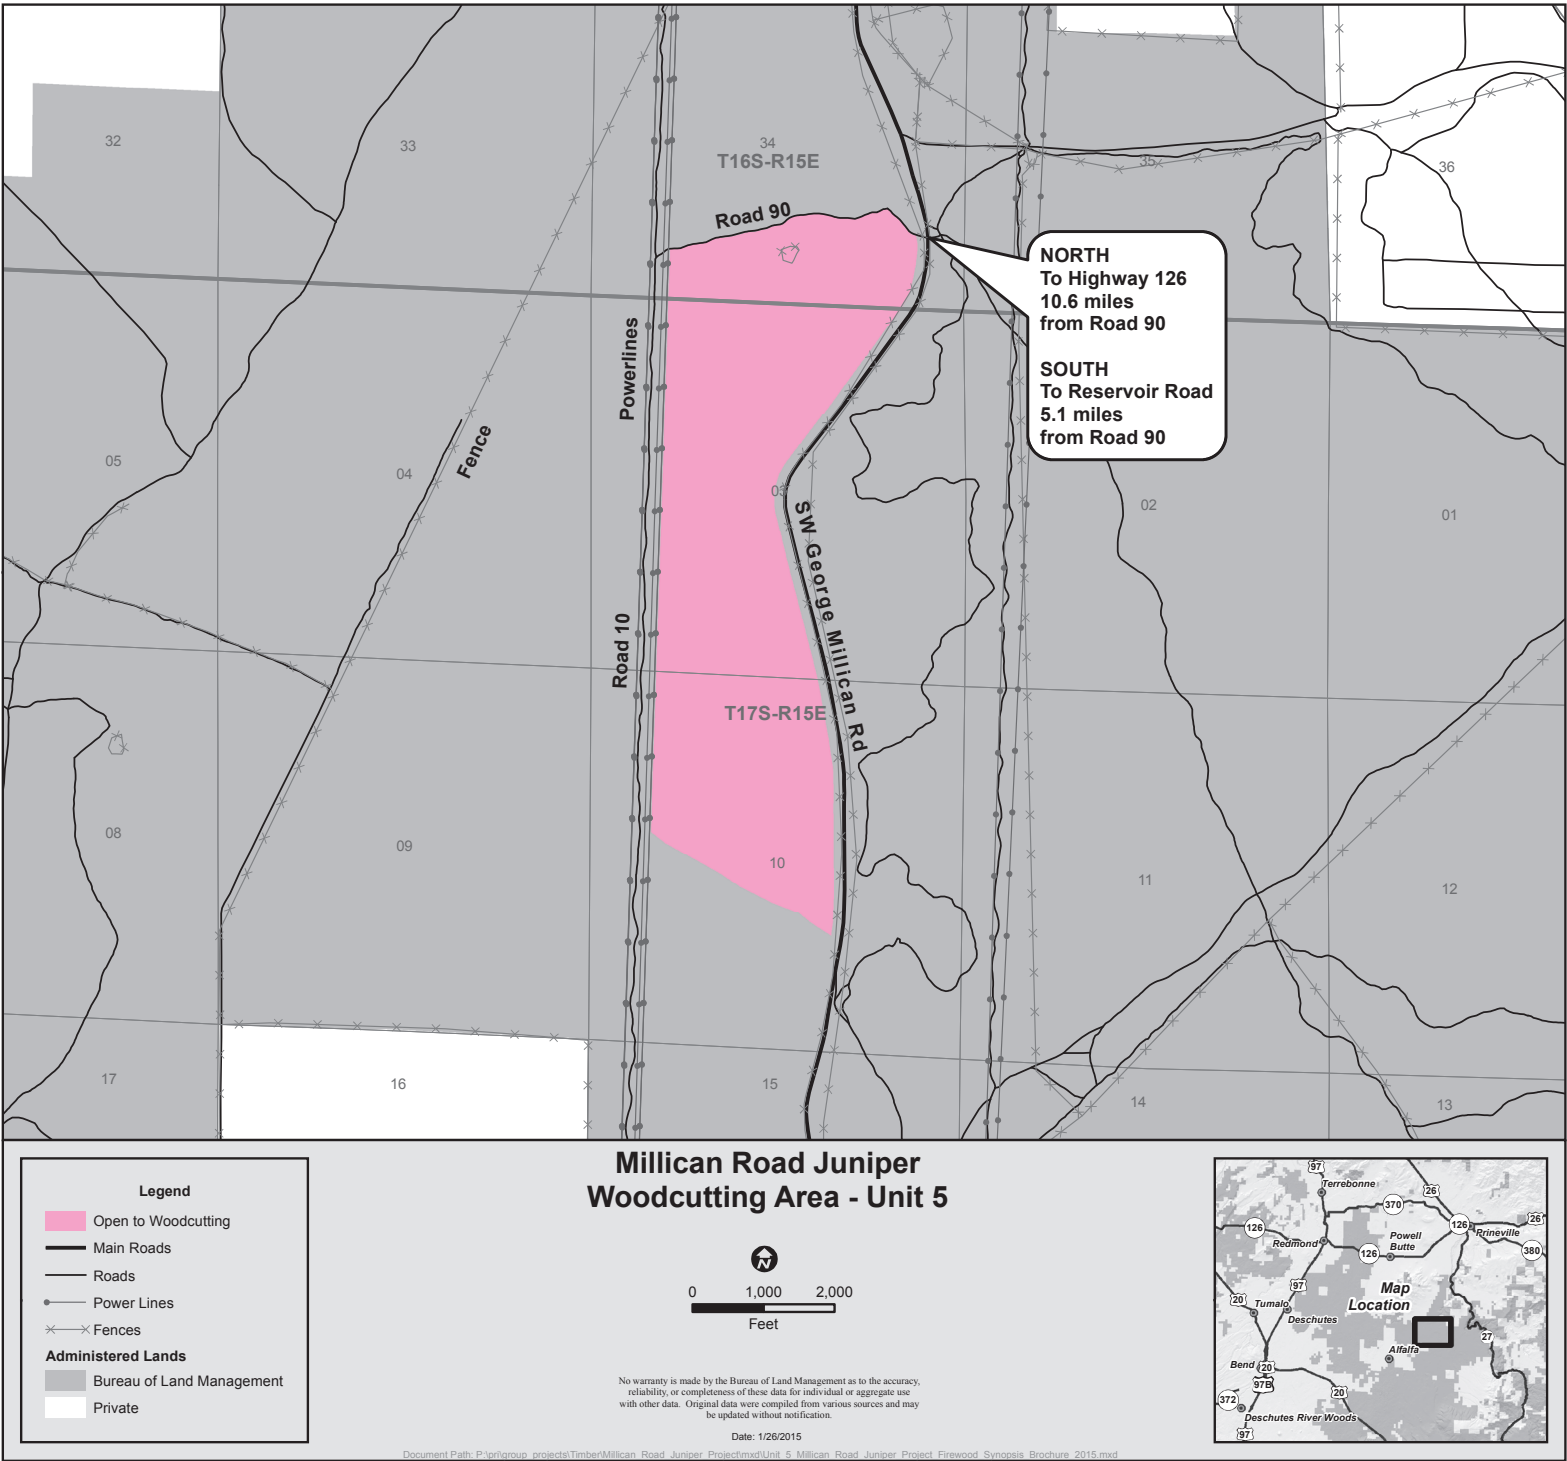

OPENS: May 1
CLOSES: November 30

YOU CAN CUT AND REMOVE: Only down juniper that has already been felled. **DO NOT CUT** standing live or dead trees, or branches from standing trees. Remaining old-growth juniper trees in this area have special habitat and aesthetic values, and some are over 1000 years old. Please help us to protect these old trees and the wildlife that live there by following these rules and immediately reporting any illegal activity to BLM, County or State law enforcement.

OFF-ROAD ACCESS IS ALLOWED, but live trees and vegetation may not be cut to create access to firewood.

Cut only within the designated 473 acre woodcutting area and the BPA powerline corridor (Road 10). The down trees were cut in Spring of 2015, so wood supply is limited and may become depleted by late summer. Call the BLM Prineville District at 541-416-6700 for woodcutting area updates.

Directions: From Bend, drive East on Highway 20, turn left (North) on the Powell Butte Highway, then right on Alfalfa Market Road to Millican Road. Turn left on Millican and proceed North about 5 miles. Turn left on BLM Road 90. From Prineville or Redmond, turn South off Hwy 126 at Millican Road. Proceed 10.6 miles and turn right on BLM Road 90.

Have an Apple (IOS) or Android device?

Try the mobile PDF Maps app available from Avenza to use geospatial information to find your exact location on these maps. The PDF Maps app can read thousands of professionally made maps available through the Avenza map store. Spatially referenced PDFs allow you to view your location, record GPS movements, save locations and find specific places.

For more information, please visit Avenza's website at <http://www.avenza.com/pdf-maps>

To download the maps in this Synopsis, please visit Avenza's website at <http://www.pdf-maps.com/get-maps>

Use the PDF-Maps App to search for the primary location of the firewood cutting area you are interested in. For example, you can enter "Deschutes National Forest", or "Ochoco National Forest" or "Crooked River National Grassland". **Once the primary location is found, look for the name of the firewood cutting area you want to download under the heading of the primary location.**

DISCLAIMER: Electronic maps on the Avenza website are provided for your convenience only; they do not replace the actual maps in the 2015 Central Oregon Personal Use Firewood Synopsis. Pursuant to the terms and conditions of your firewood cutting permit, it is required for you to have the firewood permit and firewood synopsis in your possession while cutting or removing firewood.

Scan this QR code with your smartphone to be directed to the Avenza website for more information.

Scan this QR code to download the PDF Maps App for IOS or Android devices.

Firewood Cutting Season:

The firewood cutting season is limited to the dates specified on unit maps. This seasonal restriction is in place to protect roads that are more likely to be saturated with water outside of the specified dates, and to protect soils that could be damaged due to high soil moisture.

NOTES

NOXIOUS WEEDS devour 4,600 acres of public land doing millions of dollars worth of damage in the west each year.

Also known as exotics and invasive plants, noxious weeds:

REDUCE forage diversity and quality for wildlife and livestock
REDUCE nesting for animals
CHOKe OUT native plant life
CAN INCREASE wildfire frequency

YOU Can Help By...

Washing your vehicle prior to entering Public Lands - especially the tires, undercarriage, muffler, etc to remove any noxious weed seeds that you may have picked up along roadways.

Properly disposing of garden waste. (no dumping on Public Lands!).

Be aware and don't transport loose soil and plant parts.

Prevent the spread of NOXIOUS WEEDS

Toadflax

Toadflax is a highly competitive perennial with yellow flowers similar to snapdragons.

Spotted knapweed

Spotted Knapweed is a deep rooted perennial. Purple to pink flowers bloom June - October.

Toadflax and Spotted Knapweed are just two of many noxious weeds threatening healthy plant communities in Central Oregon. For an extensive weed list and additional information go to:

www.deschutes.org/weeds

With the help of many volunteers, public land managers organize weed pulls, clip seed heads, put biocontrol agents (natural insect enemies) onto weed populations, arrange for herbicide spraying on certain sites, and participate in local weed boards and partnerships.

Need more information or want to join the battle against noxious weeds?

Contact the Invasive Plant Program Manager for the Deschutes National Forest, Ochoco National Forest and the Crooked River National Grassland:

Sarah Callaghan 541-416-6500
